

This snapshot summarizes available data on Bangladeshi nationals in Europe in 2020 and 2021. The first page visualizes the number of Bangladeshi nationals who arrived by land and sea in the European Union and those who transited through the Western Balkan and Eastern Europe region in 2021. The data on arrivals and transits is made available by national authorities and then gathered by the IOM DTM Europe¹. Numbers of apprehensions or registrations at the border in the Western Balkan and Eastern Europe region are not summed up to avoid double counting of the same persons who transit through multiple countries in their intent to reach Central and Northern Europe. The second and third pages show numbers of Bangladeshi nationals residing in Europe in 2020 by gender and European region as reported by UNDESA.

The snapshot is part of the outputs of the EU-funded Displacement Tracking Matrix (DTM) project “Regional Evidence for Migration Analysis and Policy” (REMAP). The objective of DTM REMAP is to strengthen the evidence-based formulation and implementation of humanitarian and development policy and programming on migration and forced displacement in Afghanistan, Bangladesh, the Islamic Republic of Iran, Iraq and Pakistan.

According to the 2020 International Migrant Stock compiled by UNDESA³, a total of 456,516 Bangladeshi nationals resided in Europe in 2020. Sixty per cent of them were male and forty per cent were female. The number of Bangladeshi nationals in each European country in 2020 is shown in Annex 1, together with gender-disaggregated numbers. UNDESA estimates the number and composition of migrants on the basis of data obtained from population censuses, population registers and national surveys. The dataset provides estimates of the international migrant stock by age, sex and origin for the mid-point (1 July) of each year: 1990, 1995, 2000, 2005, 2010, 2015 and 2020.
